from x86 windows free performance contains about this tool requires a bootable CD or USB key. content of this tool The free Microsoft System Preparation Tool (sysprep) makes it easy to prepare your system for Microsoft Windows® Operating System deployments. This tool creates system files and offers an easy method to create custom Windows Server® images. Sysprep enables you to create custom bootable ISO images of Microsoft Windows Operating Systems. Using sysprep, you can pre-install applications, configure system services and other features of a Windows Server operating system. You can also create desktop, installation, or deployment images of Windows 10. System Preparation Tool (sysprep) (SYSTEM PREPARATION TOOL) 2.2.1 4 July 2018 sysprep 3.1.2 - Download free portable version Download free portable version of the System Preparation Tool. 2.3 6 June 2018 New features free sysprep 3.1.2 portable To make it easier to create custom Windows OS images, the free System Preparation Tool (sysprep) 3.1.2 now supports ISOs with up to 100GB of storage. Benefits SYSPREP creates an ISO image of a Microsoft Windows operating system (OS) that you can install and use on your computer or in a virtual machine. This image may include components that you don't use or that have changed since the last time you installed Windows. This tool can create an ISO image of a Microsoft Windows 10 OS that you can install on your computer, but only in the Microsoft Windows 10 Anniversary Edition or the Windows 10 Enterprise Education Edition, not in the standard editions. Creating a custom Windows 10 image is easy with sysprep. You can use a variety of Windows 10 images you can find online to customize the Windows 10 operating system that you use on your computer. You can then create an ISO image of the customized Windows 10 image. Microsoft's ISO file format was developed to ensure that you can create multiple Windows OS images without having to make separate copies. You can convert your ISO image to a file format that is supported by other programs, such as an IMG file or RIPPED IMG file. You can create Windows 10 bootable ISO images with sysprep. Windows 10 Enterprise Edition includes a USB- 82157476af
